C2-00 CURRENT REST API — IMPLEMENTED

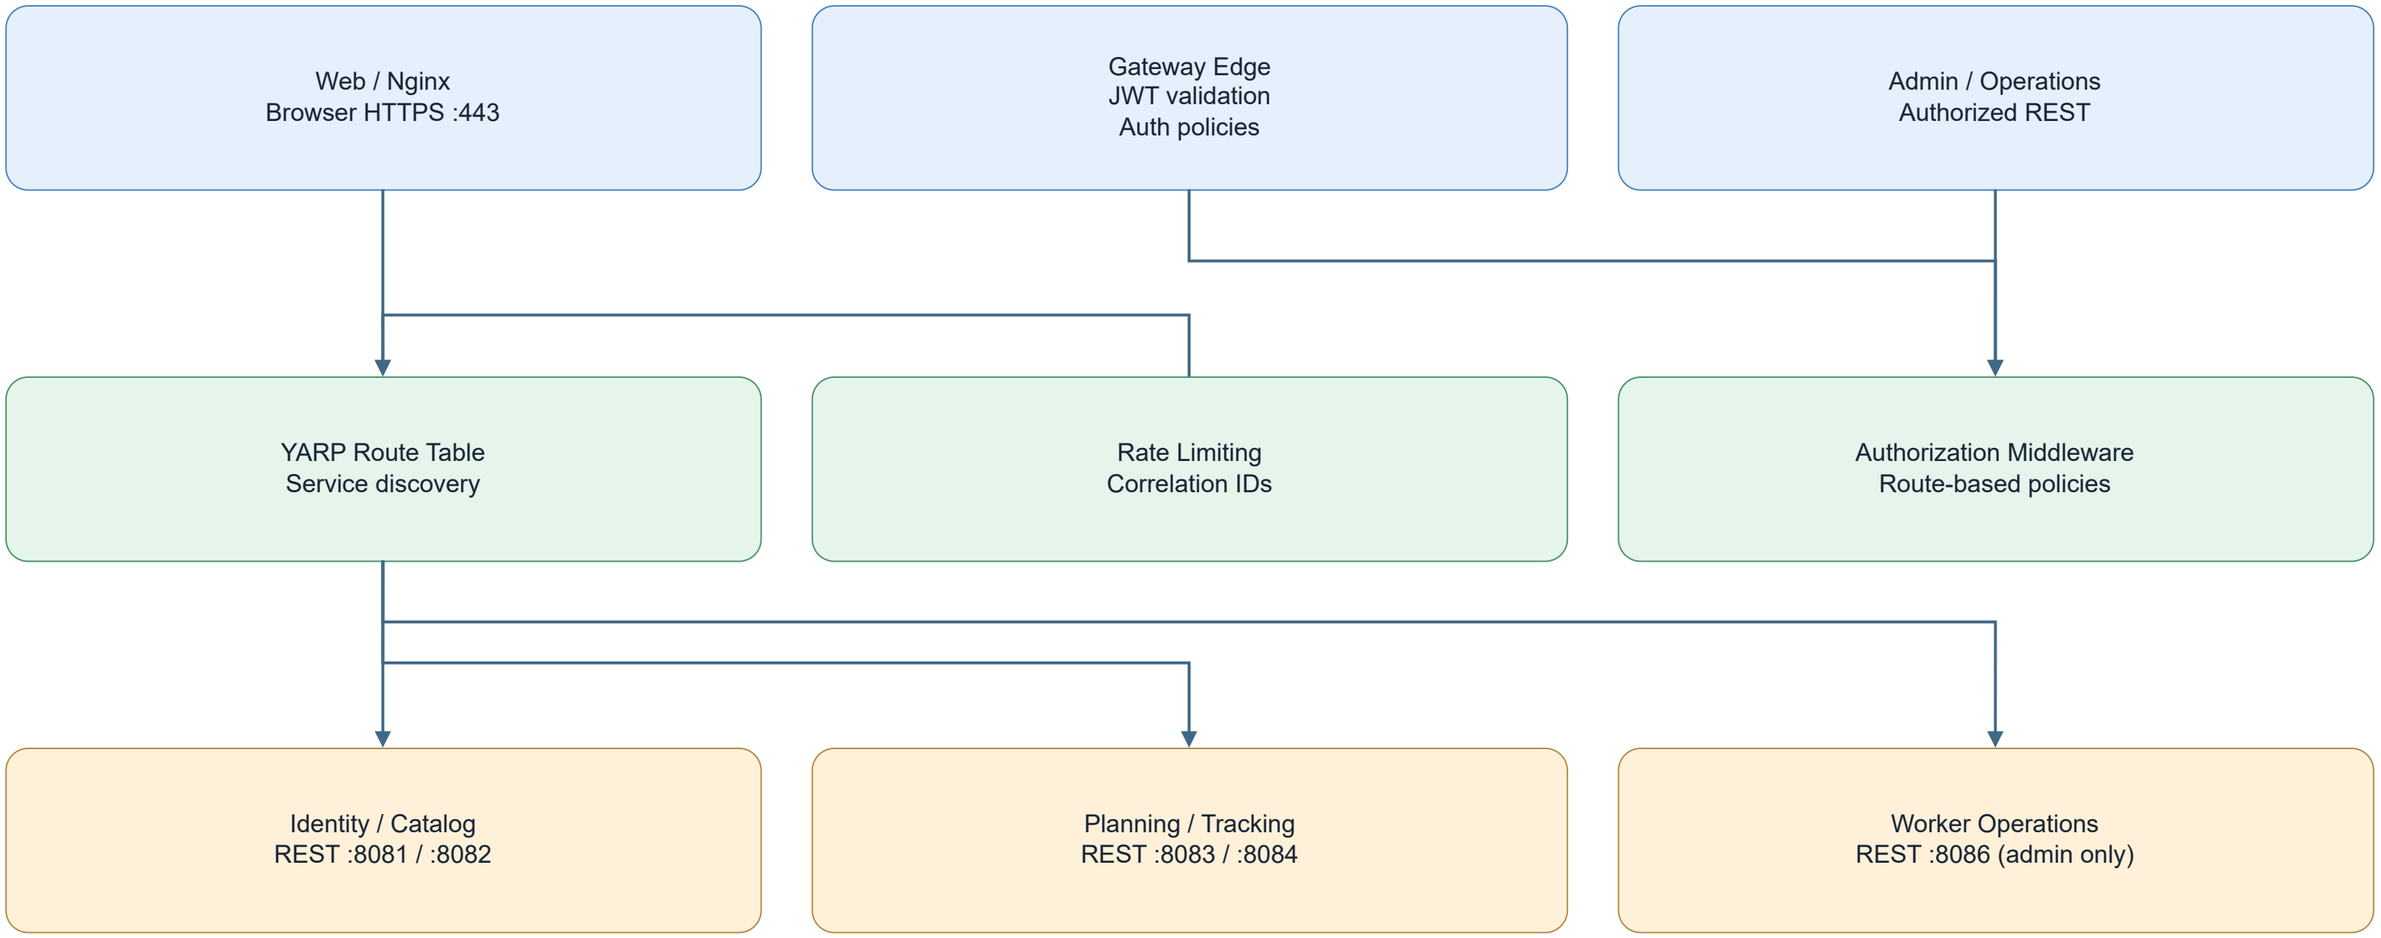

Actual .NET 9 application classes and EF Core entities. Docker Compose has ONE application database; target microservices below are NOT deployed.

C4 Level 3 / COMPONENT VIEW • Blue: inbound API • Green: application logic • Amber: storage / integration • Dashed: asynchronous or optional

C2-01 API GATEWAY — TARGET

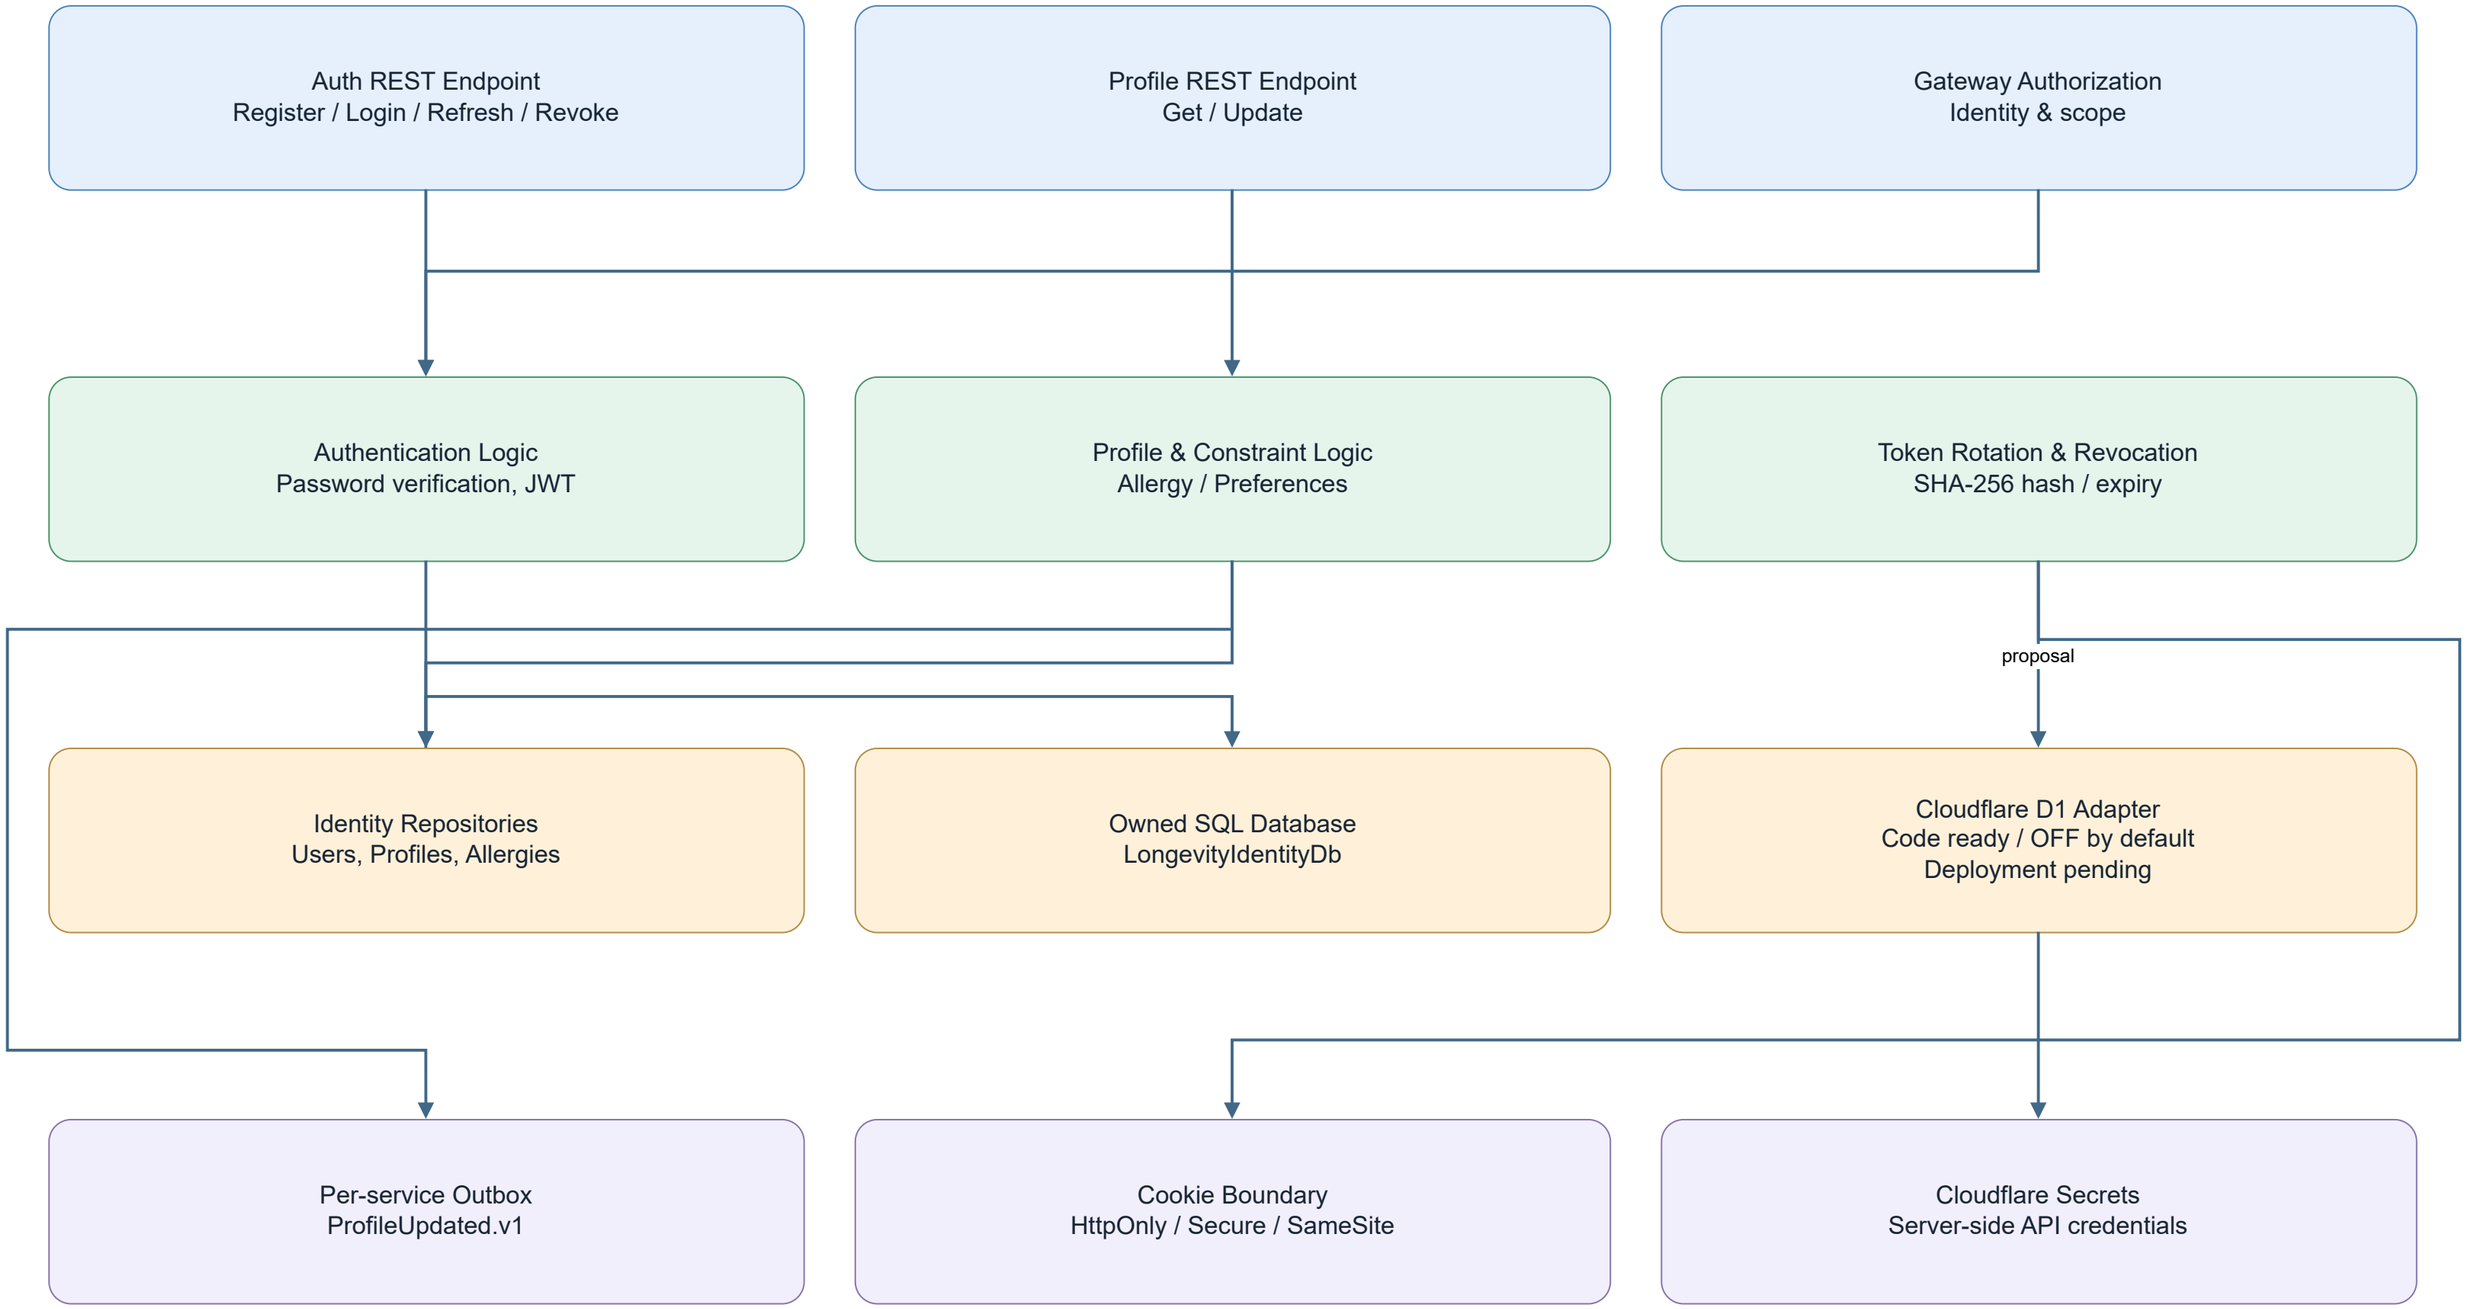

ADR-005 proposed YARP boundary (:8080 internal / HTTPS :443 public). Not present in current source or Docker Compose.

C4 Level 3 / COMPONENT VIEW • Blue: inbound API • Green: application logic • Amber: storage / integration • Dashed: asynchronous or optional

C2-02 IDENTITY & PROFILE — TARGET

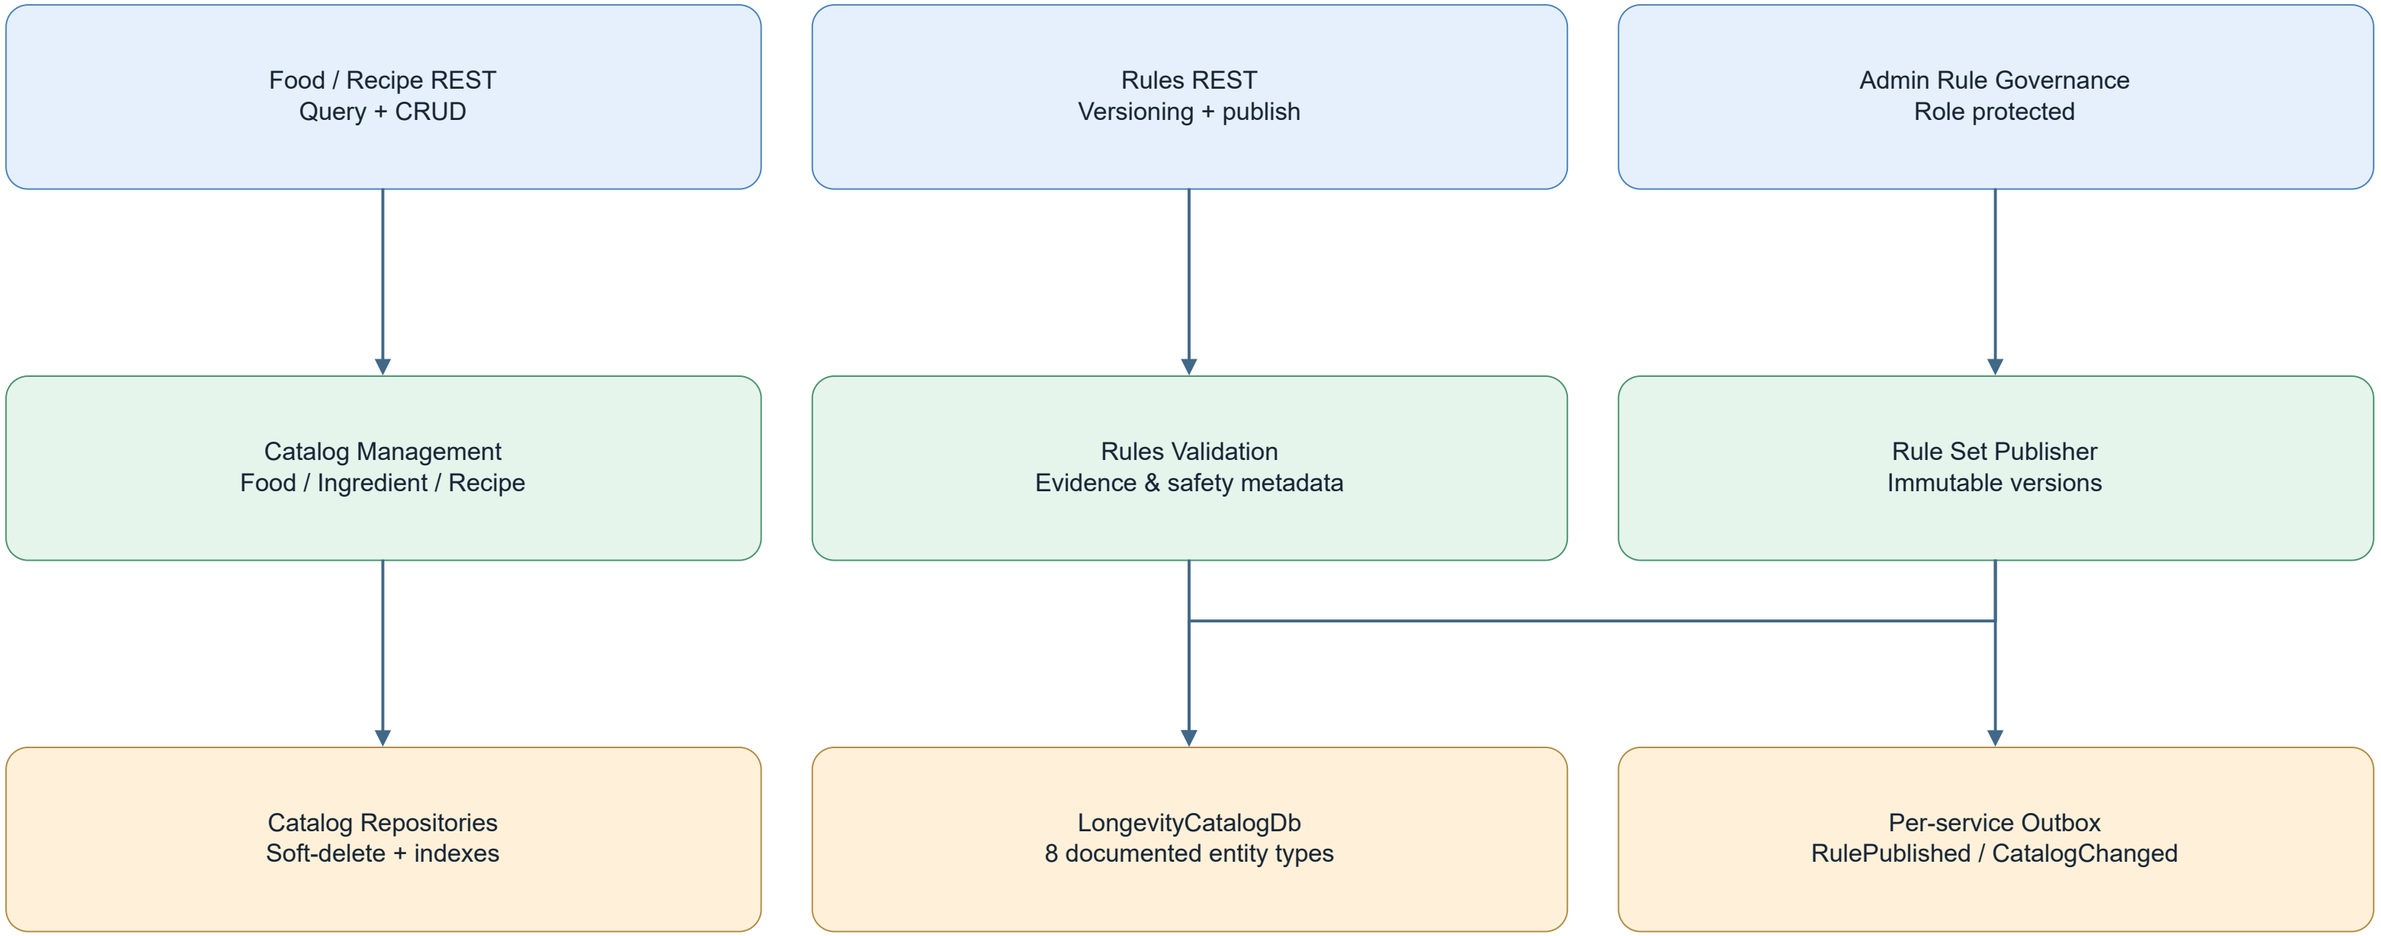

Proposed service-owned Identity boundary (:8081). .NET Cloudflare adapter exists behind a disabled flag; live D1 deployment pending.

C4 Level 3 / COMPONENT VIEW • Blue: inbound API • Green: application logic • Amber: storage / integration • Dashed: asynchronous or optional

C2-03 CATALOG & RULES — TARGET

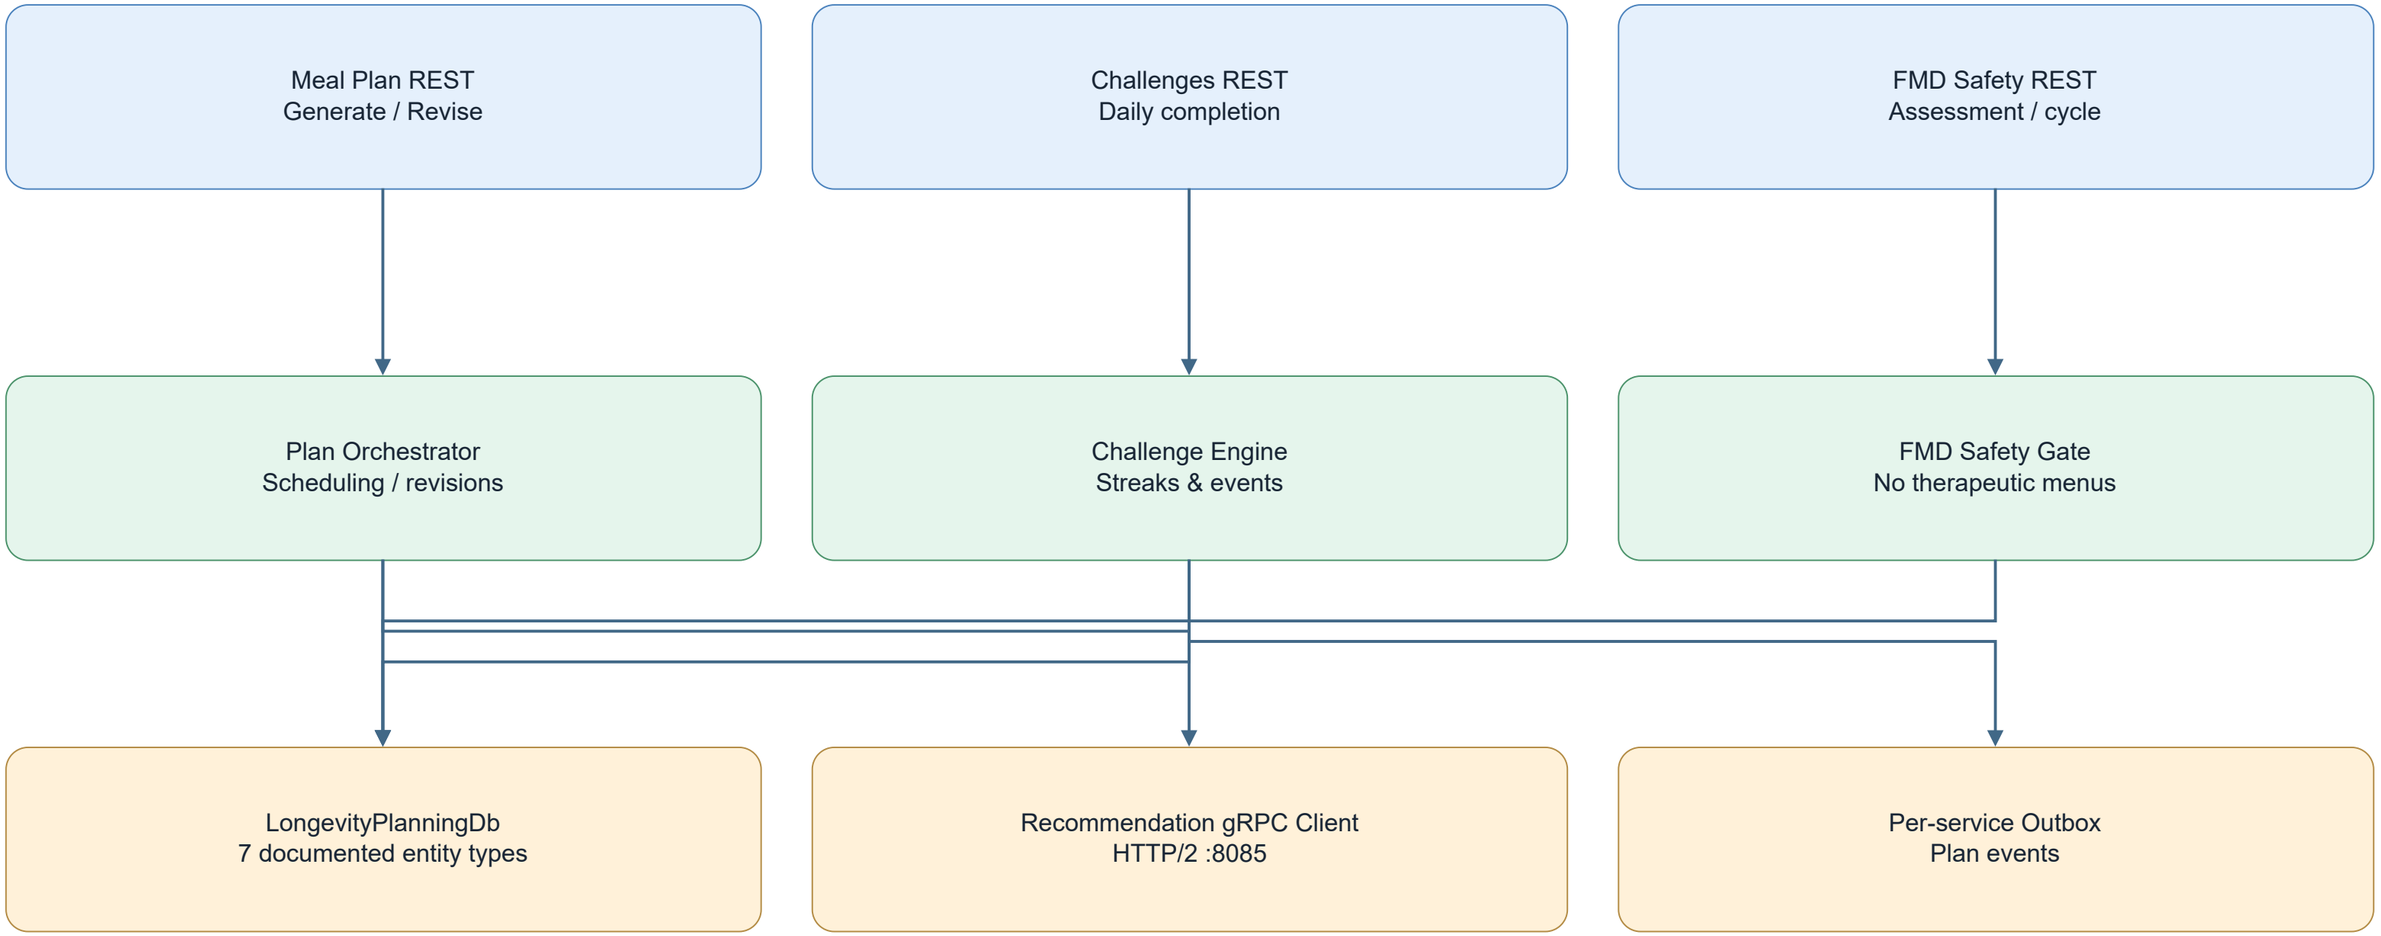

Design intent only; Catalog service (:8082) and its database are not in today's Docker Compose.

C4 Level 3 / COMPONENT VIEW • Blue: inbound API • Green: application logic • Amber: storage / integration • Dashed: asynchronous or optional

C2-04 PLANNING — TARGET

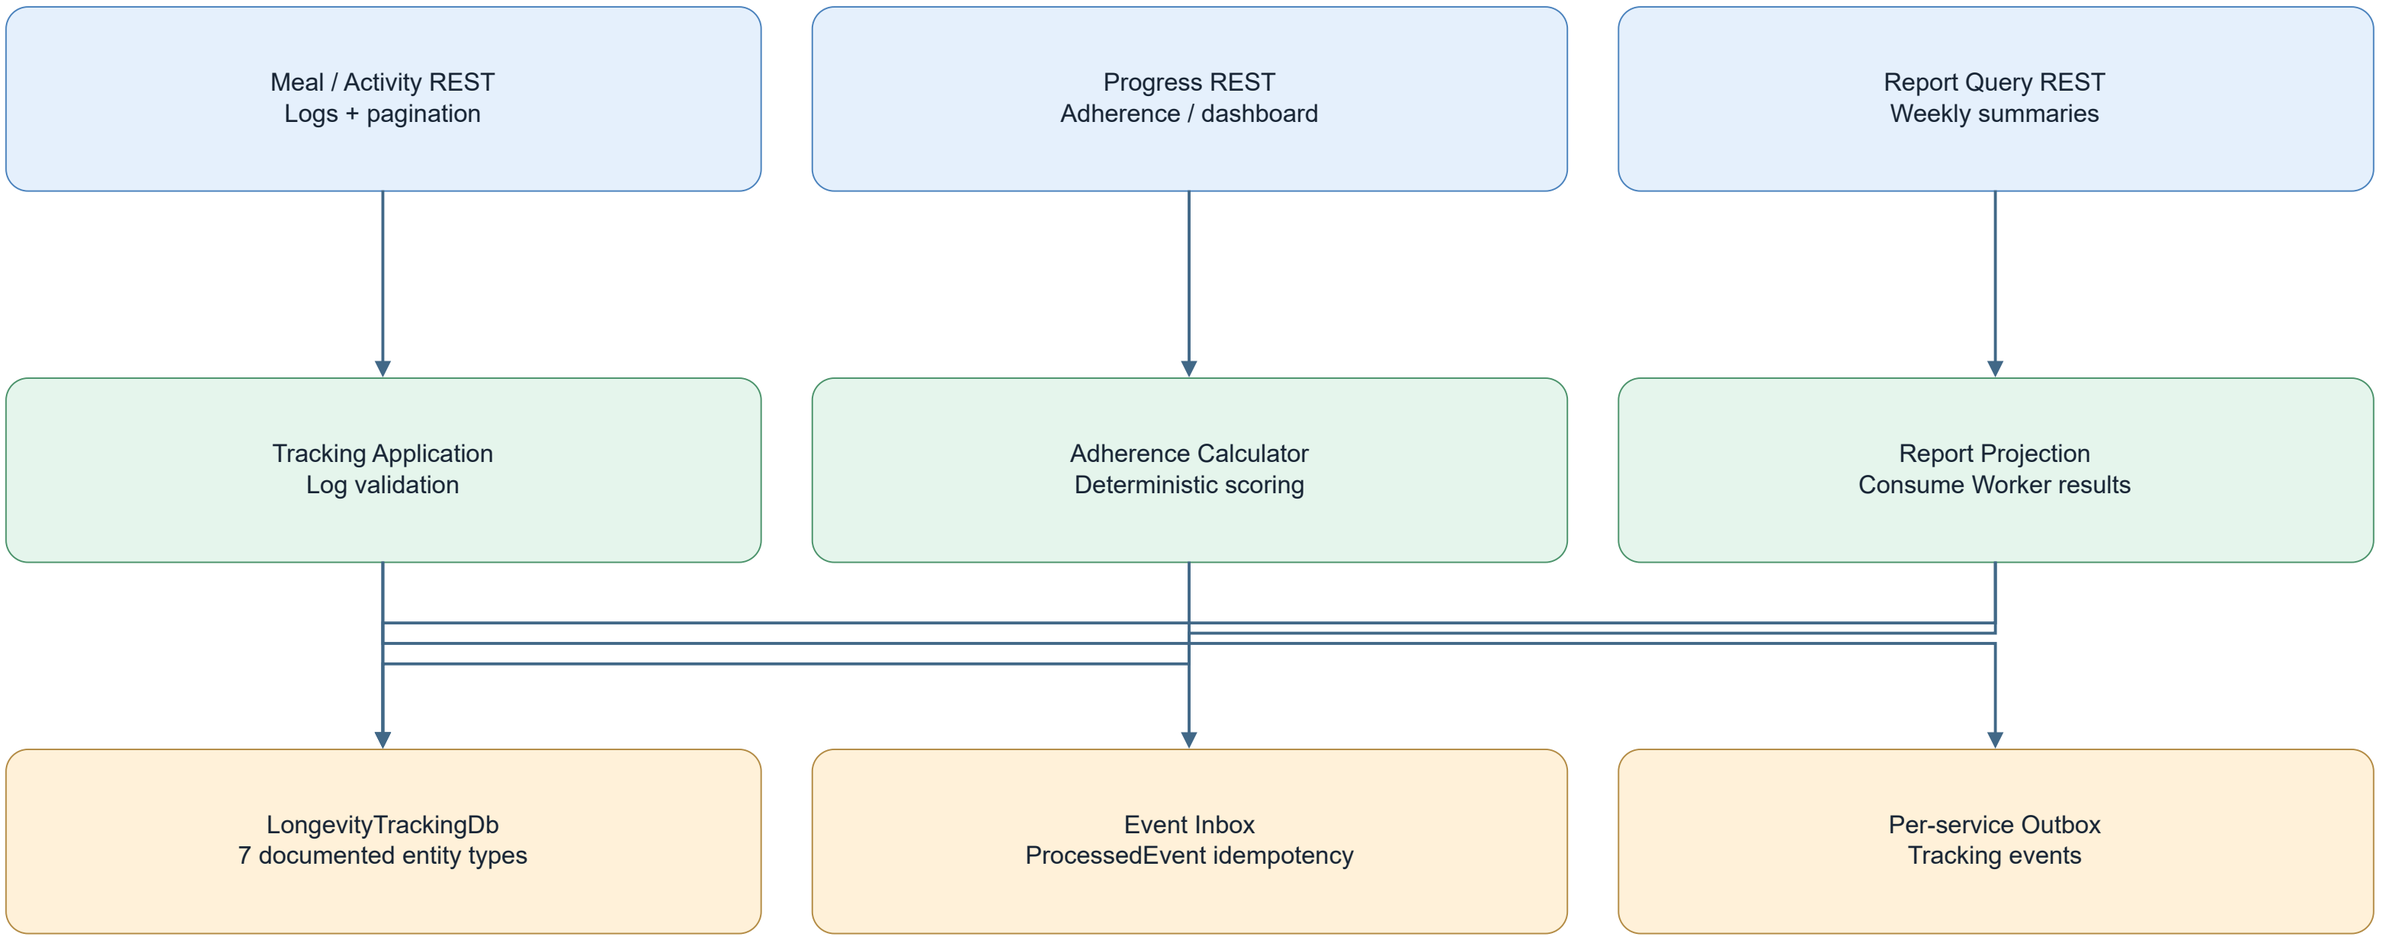

Design intent only; Planning service (:8083) owns plans/challenges/FMD. Calls Recommendation gRPC :8085; NEVER direct DB of another service.

C4 Level 3 / COMPONENT VIEW • Blue: inbound API • Green: application logic • Amber: storage / integration • Dashed: asynchronous or optional

C2-05 TRACKING & PROGRESS — TARGET

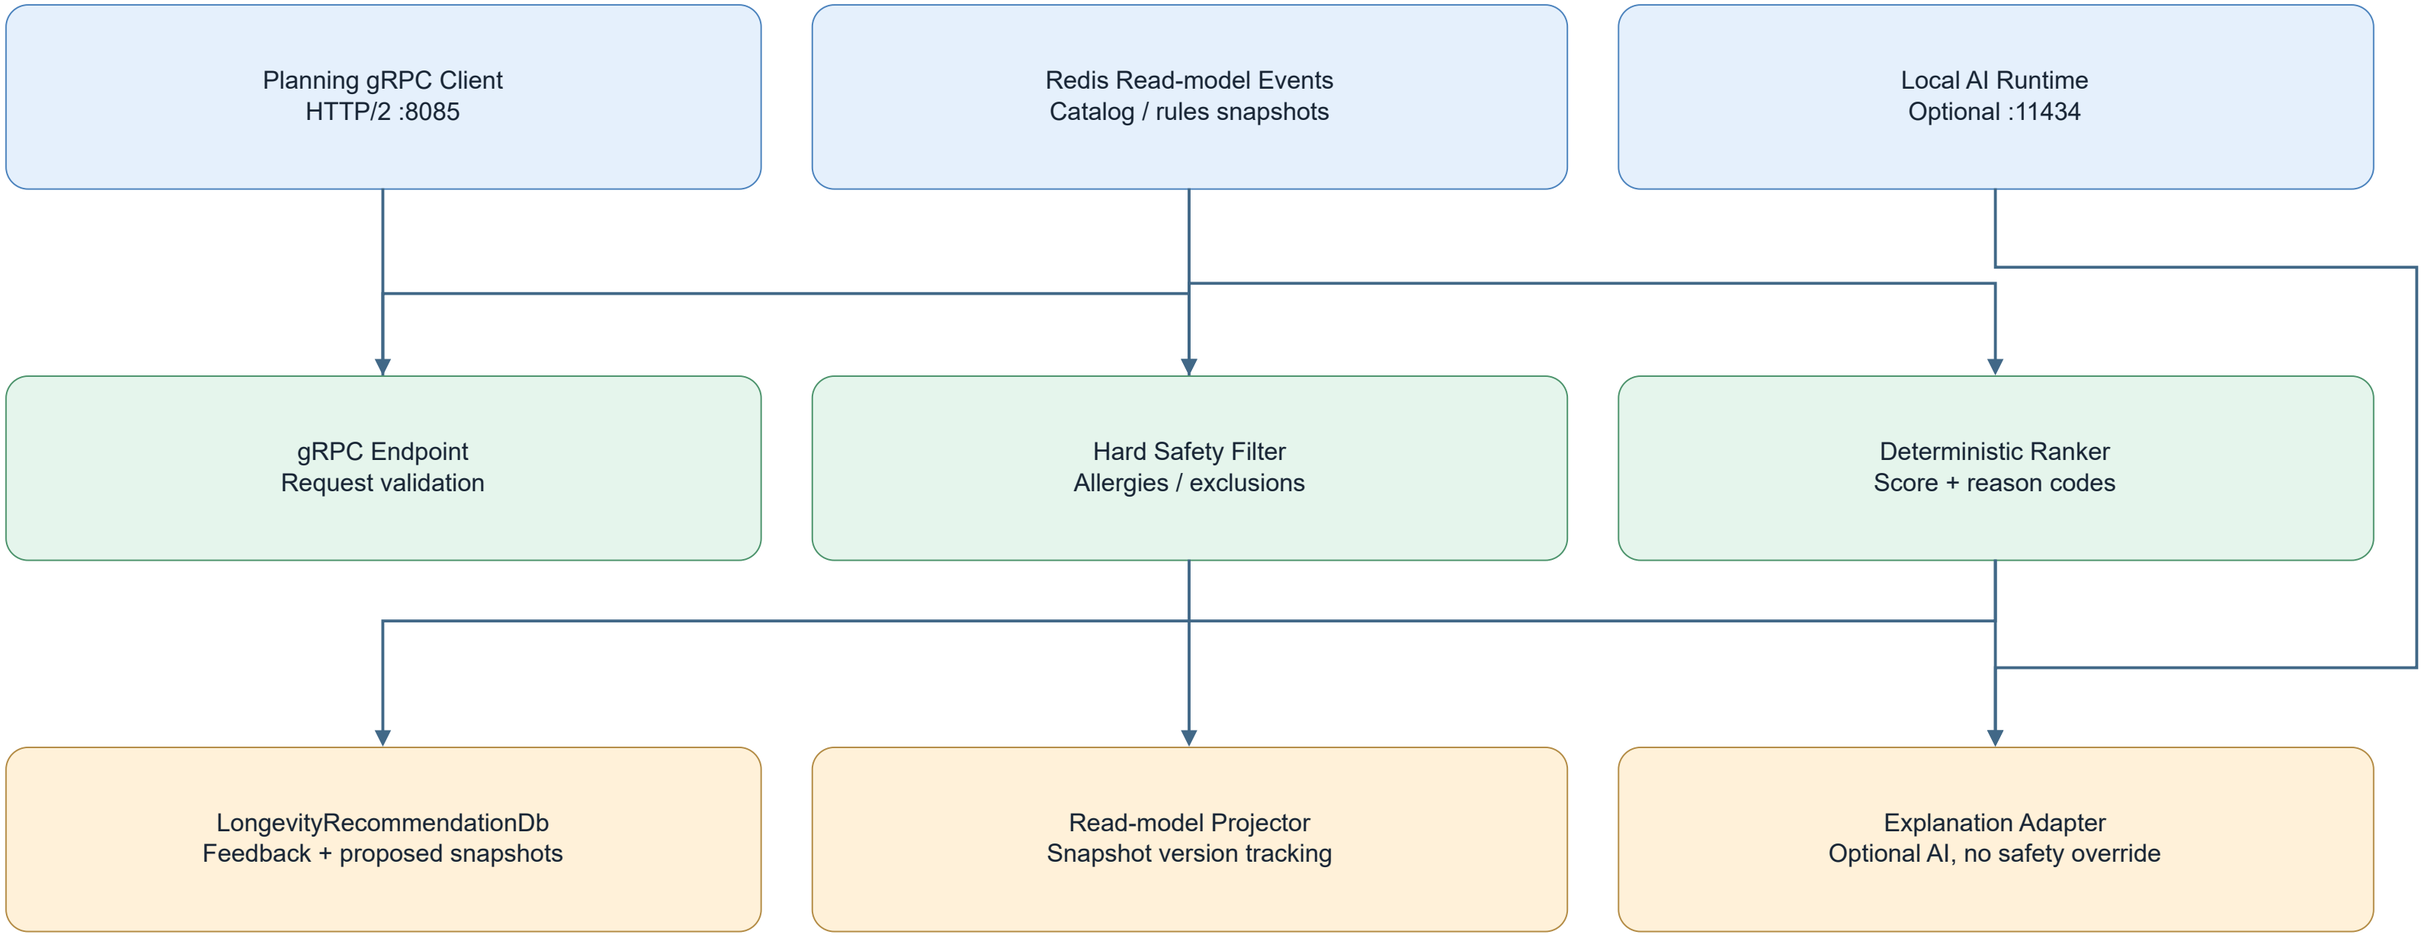

Design intent only; Tracking service (:8084). Owns logs, adherence, windows, weekly reports; consumes integration events idempotently.

C4 Level 3 / COMPONENT VIEW • Blue: inbound API • Green: application logic • Amber: storage / integration • Dashed: asynchronous or optional

C2-06 RECOMMENDATION gRPC — TARGET

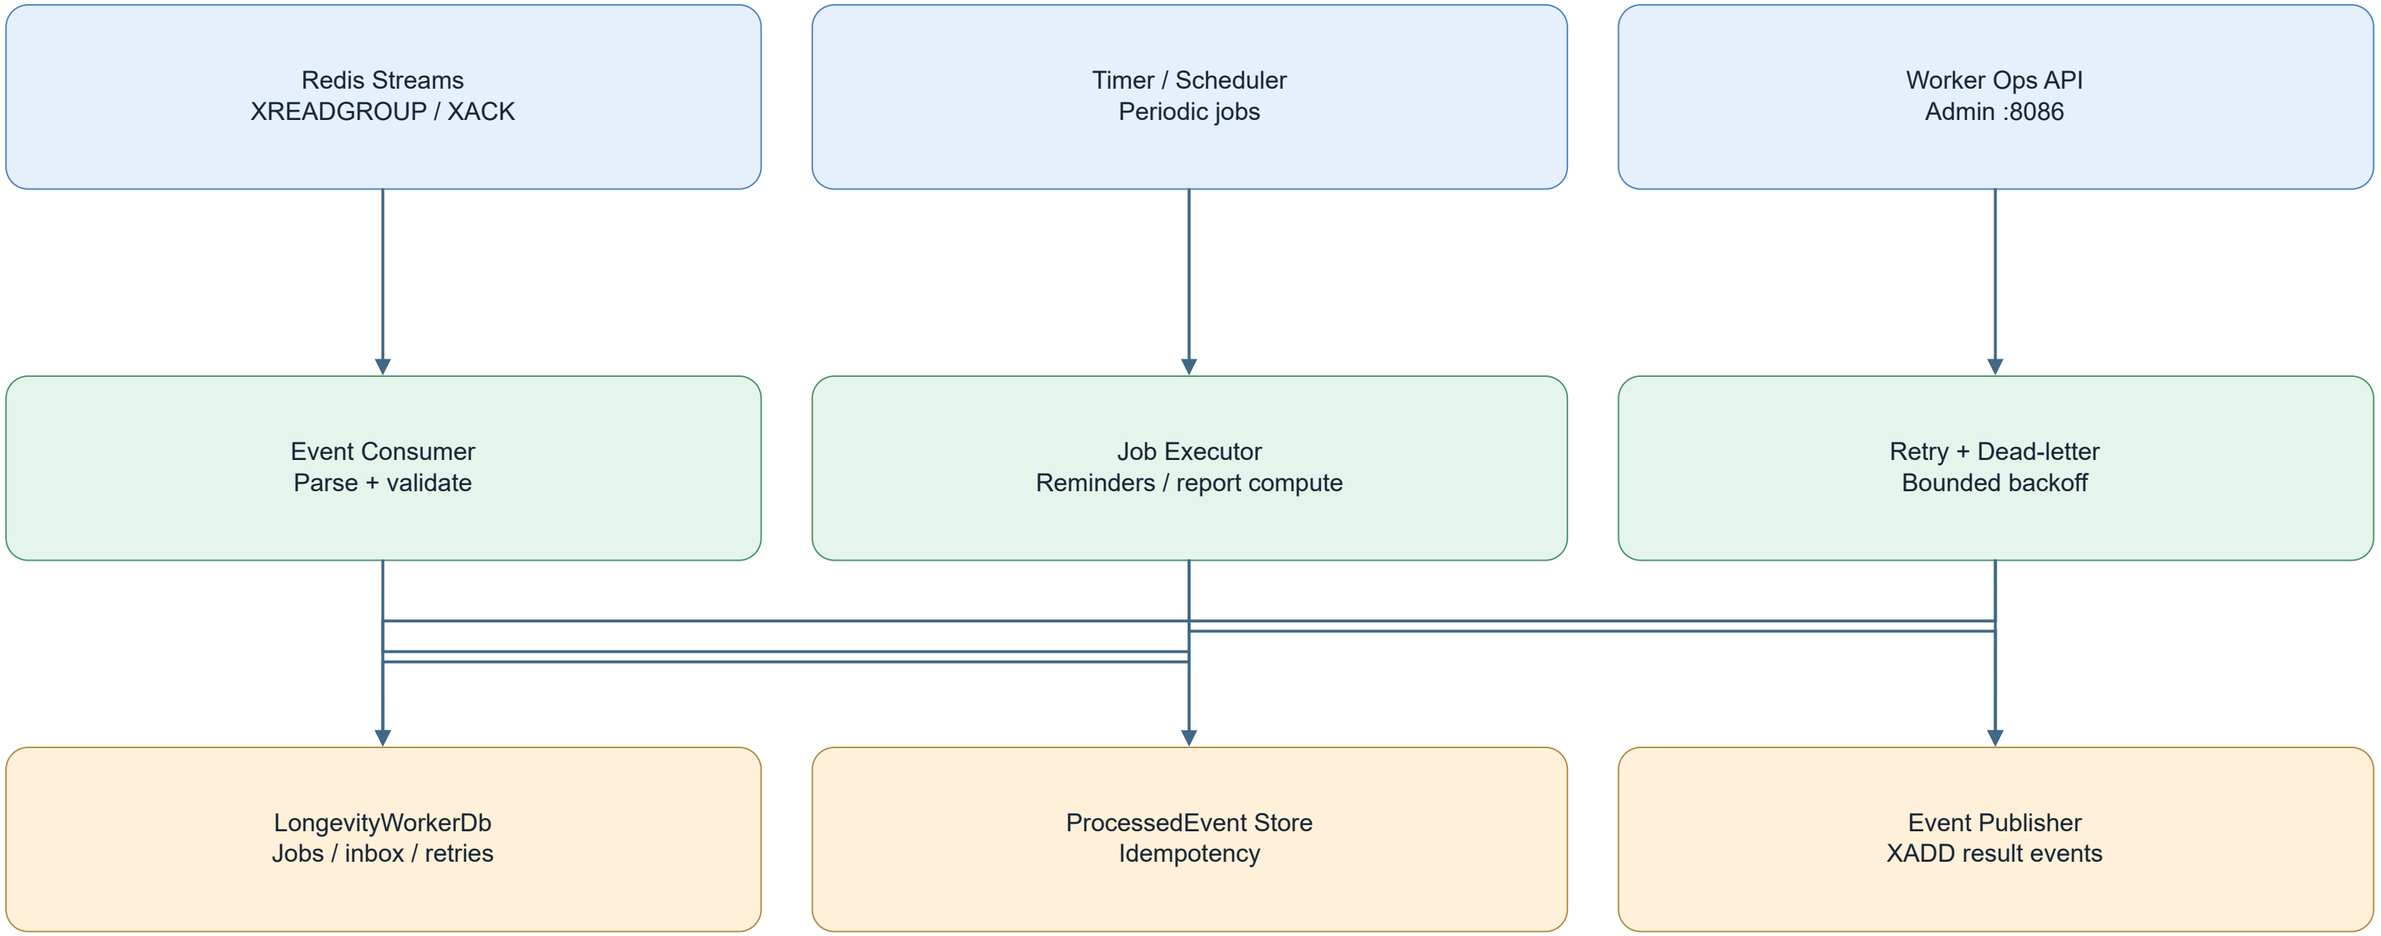

Recommendation process exists as a skeleton; planned safety filter, ranker and recommendation-owned DB are NOT implemented.

C4 Level 3 / COMPONENT VIEW • Blue: inbound API • Green: application logic • Amber: storage / integration • Dashed: asynchronous or optional

C2-07 BACKGROUND WORKER — TARGET

Worker process exists but target asynchronous job engine, retries, inbox and worker-owned DB require implementation.

C4 Level 3 / COMPONENT VIEW • Blue: inbound API • Green: application logic • Amber: storage / integration • Dashed: asynchronous or optional
